Summary

Detail-oriented Developer with a strong foundation in web development and a passion for building user-centric applications. Seeking a beginner role to enhance and explore my technical knowledge gained in the last four years.

Education

Lalitpur Engineering College **2021 – 2025**
Bachelor in Computer Engineering *Lalitpur, Nepal*

Relevant Coursework

- Data Structures
- Software Methodology
- Algorithms Analysis
- Database Management
- Artificial Intelligence
- Internet Technology
- Systems Programming
- Computer Architecture

Experience

Project & Product Manager / SEO Specialist / Admin Handler **March 2026 – Present**
Technology Spot *Tinkune,Kathmandu (Onsite), Full-time*

- Working as Product Manager and Admin Handler for the **FactoryToDoors** project (Australia), a factory-direct furniture e-commerce initiative, overseeing the product listing pipeline and day-to-day admin operations.
- Planning feature rollouts and tracking delivery timelines for FactoryToDoors, liaising between development and business stakeholders.
- Working as SEO Specialist for orrog.com, a Bhutan travel company, producing SEO titles, meta descriptions, keywords, and focus keyphrases across tour and destination pages.
- Coordinating cross-team communication to align content, product, and admin workflows across concurrent projects.

Full Stack Engineer Trainee **February 2026 – Present**
Dailo Technology Pvt. Ltd. *Kathmandu, Nepal (Remote, Full-time)*

- Developing and maintaining **Restro**, a multi-tenant SaaS restaurant management platform with custom domain mapping, deployed live at arnama.palikanepal.com (code: github.com/Prajol10/restro).
- Building backend features using ASP.NET Core and C# for multi-tenancy, tenant isolation, custom domain routing, and restaurant-specific configurations (themes, logos, layouts).
- Developing API endpoints with Entity Framework and SQL Server for online ordering, POS/KOT integration, admin dashboard, and customer authentication.
- Built **LMS Platform** (github.com/Prajol10/LMS-multitenant), a multi-tenant Learning Management System with course management, user roles, and progress tracking.
- Building **Travel Agent Platform / Kailash Trails** (github.com/Prajol10/Travel-site), a multi-tenant travel agency SaaS with tour listings, bookings, and CMS-driven content.
- Building a multi-tenant **Hospital Management Platform** with patient, staff, and admin-facing modules using React and ASP.NET Core.
- Collaborating with development teams using Agile methodologies and Git version control to deliver scalable cloud-based SaaS solutions.

IT Support Specialist **January 2026 – March 2026**
National Institute for Competitive Exam *Bagbazar, Kathmandu*

- Managing and maintaining the institute's mobile application, ensuring smooth functionality for students accessing course materials, exam schedules, and notifications.
- Handling website administration including content updates, bug fixes, and performance optimization for students and faculty.
- Operating and troubleshooting smart board technology and providing technical support during lectures and exam preparation sessions.

Full Stack Developer Intern **November 2025 – January 2026**
Dailo Technology Pvt. Ltd. *Kathmandu, Nepal*

- Completed internship developing core features for the Restro24 multi-tenant SaaS platform.
- Built a **Hall Booking System** (github.com/Prajol10/hall-booking-system) and a **Student Management System** (github.com/Prajol10/Prajjwal_Ghimire_SMS) using React and ASP.NET Core.
- Developed automated test scripts using Python and Selenium for regression testing, reducing manual testing time by 40%.
- Gained hands-on experience with ASP.NET Core, Entity Framework, multi-tenant architecture, and cloud deployment on AWS.

Projects

Itexgiti | *Django, MongoDB, React, OpenAI API, Github API* **July 2025 – Present**

- Designed and developed an AI-powered, Git-based learning platform enabling developers and students to learn through hands-on projects, AI mentorship, and real-time GitHub-style collaboration.
- Built a modular backend with Django REST Framework and PostgreSQL to handle user authentication, project storage, AI chat history, and roadmap progress tracking.
- Integrated GitHub API for repo syncing and portfolio showcasing, and OpenAI API for instant AI-driven code review, bug fixes, and personalized learning suggestions.
- Developed a React.js frontend with a responsive, dashboard-style UI for managing projects, tracking progress, and accessing AI feedback.

Loan Approval Prediction System | *Python, Scikit-learn, Pandas, NumPy* **March 2024 – May 2024**

- Developed an ML pipeline to automate loan approval decisions, achieving 87% accuracy with a Random Forest classifier.
- Performed data preprocessing including missing value handling, outlier detection, feature encoding, and scaling, along with EDA using correlation matrices and feature importance analysis.
- Engineered features such as Total Income and Loan-to-Income Ratio, and compared multiple models (Logistic Regression, Decision Tree, Random Forest, KNN) using precision, recall, F1-score, and ROC-AUC.
- Created confusion matrices and visualizations to evaluate model performance and business implications for financial institutions.

Football Highlights Generator | *Faster RCNN, SSIM, MediaPipe, 3D CNN* **January 2025**

- Developed an automated soccer highlight system using advanced machine learning techniques for keyframe extraction, action recognition, and transcription.
- Implemented SSIM and Faster R-CNN to detect key players, ball positions, and visually significant moments in real-time video.
- Used MediaPipe Pose Estimation and 3D CNNs to recognize complex actions such as goals, fouls, and movement patterns for precise event classification.
- Integrated batch audio transcription with video frames to provide context-aware highlights, enhancing viewer engagement.

Sawari Bhada: Online Car Renting System | *Aho-Corasick, HTML, CSS, JS, PHP* **July 2024**

- Built a vehicle rental platform for booking cars for tours, events, or test drives across Nepal.
- Implemented Aho-Corasick string matching for fast car search and a rating-based recommendation feature.

Technical Skills

Languages: Python, JavaScript, C/C++, C#, SQL
Developer Tools: VS Code, PyCharm, Xcode, Visual Studio
Databases: MongoDB, SQL Server, PostgreSQL, MySQL
Cloud Technologies: AWS
Technologies/Frameworks: .NET Core, ASP.NET, Entity Framework, GitHub, LaTeX, React.js, Node.js, Django, Selenium, scikit-learn, pandas, NumPy, Matplotlib, Seaborn

Soft Skills

Problem Solving, Team Collaboration, Agile Methodologies, Communication, Attention to Detail, Time Management, Adaptability, Critical Thinking
